# BRAND GUIDELINES

# LOGO PHILOSOPHY

## 01

The Tether Clan logo draws inspiration from connection and community, using speech bubbles as human forms to represent people coming together. The central structure reflects a network of individuals connected through shared interests and experiences. The speech bubble elements symbolize the platform's role in tethering people and enabling real-world interactions.

# LOGO VARIATIONS

## 02

The logo is designed to be versatile in application. It can be used in its typographic form, non-typographic icon form, or as a combination of both, all built on the same core concept. This ensures a consistent visual identity across mediums while allowing flexibility in how the brand is expressed.

# LOGO SYSTEM

## 03

By maintaining a clear space equal to the height of the logo typeface on all four sides, as well as between the typographic and non-typographic forms, the logo is given ample breathing room for clarity and visibility. When used together, the typographic and non-typographic forms follow a 1:4 ratio along the Y-axis, ensuring balanced composition and visual harmony. This spacing system preserves the logo's integrity and maintains strong visual impact across all applications.

# LOGO TYPE

## 04

The logo typography is created using Aliment as the primary font, chosen for its playful form that reflects the sense of interaction and community within the non-typographic icon.
For marketing and branding materials, the following typefaces are recommended to maintain visual consistency and harmony with the logo:

Primary Typeface: Aliment
Secondary Typeface: Acumin Variable Concept (Condensed)

# COLORWAY

## 05

The palette follows a split complementary color scheme, creating a playful yet balanced visual identity. Blue and yellow serve as the primary colors, while orange acts as a secondary accent used to highlight key elements. The vibrant tones represent connection, interaction, and community, reflecting the transition from digital networking to real-world experiences.

# COLOR SYSTEM

## 06

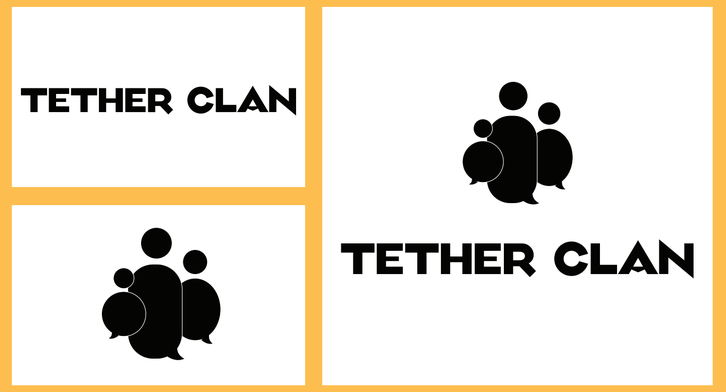

The logo can be applied in two color variations. When placed on a blue background, yellow from the palette is used, and on a yellow background, blue is applied. The central human-bubble icon changes accordingly, while the left and right human-bubble icons consistently remain orange as the secondary color. These variations provide flexibility across different contexts. For formal applications, a monochromatic treatment- either dark on light or light on dark is recommended.
